## Skin Deep/The Body Spa

I've been impressed with Skin Deep/The Body Spa in Huntington Beach ever since I experienced one of its age-defying facials. Now, I see a lot of people agree with me as Skin Deep recently landed on Fox's Hot List for Best Facial in Orange County. Returning to the spa, I opted for the organic body scrub with hydrating body mask. According to Skin Deep owner Deborah Woods, the organic body scrubs are made privately for the spa in Hawaii and are 100% natural. "They are comprised of fresh ground ginger root, red rose petals, fresh ground oats, Maui raw, finely-grained sugar, and honey extract, as well as oils indigenous to the Hawaiian Islands," Woods

says. The luxurious body mask treatment thoroughly hydrated my skin and left my body soft and moisturized. Since Woods suggested I not shower afterwards and luxuriate in the treatment, I plan to return for the spa's new Zen Water Experience, a five-stage, five-room water meditation, healing and relaxation journey. It took Woods expanding her 17-year-old spa approximately three times the size to create it. The Web site even has a "Going Green" link for conserving water, recycling and reuse options.
